

Hundreds of thousands of people all over the United States listen to an FM radio station called K-LOVE via FM translators. An action by the FCC to allow LPFM to take over these radio frequencies could leave many of these listeners, including myself and my community, without the encouraging, family-oriented programming provided by K-LOVE. For the future of our nation, and particularly our children and families, please do not remove this positive alternative to the discouraging, violent, sexually explicit content coming from the 'entertainment' industry today.
